**NOTE:**  
 A Bottleneck Course is a high demand course which students may have difficulty enrolling due to limited seats. Bottlenecks may obstruct student progress towards their degree, especially if the bottleneck course has a low success rate.  
 To be included, a course must have a minimum number (>150) of enrolled students over five terms. A five term time frame is used to roll-up a sufficient number of grades for consideration and still be current. Also, the course must be a bottleneck for a given minimum portion of the terms it is offered.  
 Independent Study courses are excluded since they are offered on an as-needed basis. PE activity courses are globally excluded since they do not count towards GE or major requirements.  
 The Max-Wait-List column is the highest number of students waitlisted for all sections of the course during the most recent registration cycle.  
 If the number of Total repeat takers is preceded by an asterisk(\*), it indicates the course is repeatable by design.

**NOTE:**  
 A Gateway Course has a student success rate (C- or better) less than a fixed threshold. For this report the threshold is an 85% success rate. To be included, a course must have greater than 150 enrolled students over five terms. A five term time frame is used to roll-up a sufficient number of grades for consideration and still be current. PE activity courses are globally excluded since they do not count towards GE or major requirements. These courses met both criteria for all 5 terms.  
 If the number of total repeat takers is preceeded by an asterisk(\*), it indicates the course is repeatable by design.
